

DIREX® 4L
EPA REG. NO. 66222-54
FOR CONTROL OF MANY ANNUAL AND
PERENNIAL GRASSES AND
HERBACEOUS WEEDS
EPA SLN NO. AR12-0014

**Proposed Draft - 24 (c) SPECIAL LOCAL NEED
POST-HARVEST CORN**

FOR DISTRIBUTION AND USE ONLY IN THE STATES OF ARKANSAS

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- All applicable directions, restrictions, and precautions on the EPA registered label are to be followed.
- This labeling must be in the possession of the user at the time of pesticide application.
- **This label expires and must not be distributed or used in accordance with this SLN registration after August 31, 2016.**

POST-HARVEST IN CORN

Apply Direx 4L at 0.75 to 1.0 quart per acre in a tankmix program with Parazone® 3SL + COC following corn harvest to control germinating and emerged Palmer amaranth and other annual weed species. Use the higher rate for weeds approaching the maximum size of 6". Higher rates of Parazone should be used in this tankmix for most effective control (2.0 – 2.7 pts/A). COC should be used at 1 gallon/100 gallons. Tillage prior to application is acceptable however tillage following application should be avoided to prevent disturbance of the herbicide.

Apply post-harvest as a broadcast spray in a minimum of 10 gallons of spray per acre by ground. Applications should be made soon after harvest but before September 15th. Corn and cotton may be planted the following spring. Soybeans may be planted the following spring if average temperatures and average precipitation occurs during the 6 months post application.

RESTRICTIONS

- Do not use Direx 4L as a post-harvest treatment in corn stubble if Direx 4L was used postemergence in the corn crop.
- Do not apply more than 1.0 quart of Direx 4L post-harvest prior to September 15th.
- Do not apply by air.

Read the "LIMITATION OF WARRANTY AND LIABILITY" in the label booklet for Direx 4L before using.
